MBL | Biological Discovery in Woods Hole • ANNUAL REPORT 2007

## Frontiers in Science

ANNUAL REPORT 2007

About the cover: Live endothelial cell spreading on a glass surface. Birefringence image recorded with the LC-PolScope, a microscopy technique invented at the MBL (see page 12-13). Image brightness corresponds to magnitude, color to orientation of birefringence (no stains or labels were applied to the cell.) *Credit: K. Patel.*
